## TECHNICAL PRODUCT IMPLEMENTATION & PLATFORM LEAD

Accomplished Technical Lead with 9+ years of software development experience, specializing in platform architecture, end-to-end release management, and scalable technical product implementation. Proven track record of leading engineering teams, engineering robust CI/CD pipelines, and managing high-scale mobile platforms supporting **100k+ users and 30k daily active users**. Expert at driving platform improvements, rationalizing legacy codebases, and translating complex product requirements into stable, scalable production realities.

## CORE TECHNICAL EXPERTISE

**Architecture & Development:** React Native, Expo (All SDK Modules), iOS, Android, Native Module Integration, TypeScript, JavaScript (ES6+).

**State & Data Management:** TanStack Query, Redux Toolkit, Zustand, Context API

**DevOps & Automation:** CI/CD, GitHub Actions, App Store & Play Store Deployment, Ruby scripting.

**Testing & Methodology:** Maestro (E2E), Jest, Agile, Scrum, Sprint Planning.

## PROFESSIONAL EXPERIENCE

**SOFTWARE ENGINEER** | Feb 2024 – Present

**Agile Professional Group (EduTech Platform) – Birmingham, UK**

- **Platform Ownership:** Fully owned and managed a high-scale React Native platform supporting **100k+ total users and 30k daily active users (DAU)** across multiple university deployments, ensuring peak performance and system architecture integrity.
- **Production Stability:** Maintained a **98% crash-free user session rate**, heavily optimizing product stability and driving a significant turnaround in student satisfaction and user retention.
- **Release Ownership:** Managed the end-to-end App Store and Google Play release lifecycles, successfully implementing automated deployment pipelines using **Expo and GitHub Actions, Circle Ci etc.**
- **Deployment Reliability:** Introduced structured rollback processes, environment controls, and automated multi-app configuration scripts via Ruby, eliminating manual overhead and ensuring strict deployment consistency.
- **Product Implementation:** Collaborated with cross-functional stakeholders to translate product requirements into reusable UI design systems and efficient server-state management solutions.

**SENIOR LEAD DEVELOPER / TEAM LEAD** | Jan 2022 – Aug 2023

**Metronomic Technology Pvt. Ltd – United Kingdom (Remote - India)**

- **Engineering Leadership:** Led and empowered a high-performing team of 5+ React Native engineers, improving development workflows, sprint delivery efficiency, and technical execution.
- **Technical Governance:** Introduced rigorous code review standards and established a collaborative framework for high-level technical and architectural decision-making.
- **Platform Improvement:** Conducted comprehensive audits of legacy codebases, successfully identifying and removing obsolete dependencies to streamline application architecture.
- **Standards Implementation:** Spearheaded library rationalization and transitioned key enterprise projects to TypeScript, enforcing development standards that drastically improved code maintainability.

**EARLY CAREER & TECHNICAL PROGRESSION** | 2015 – 2022

**Senior Web & Mobile Developer | PHP Developer - India**

- Progressed through engineering roles to design, implement, and deliver scalable web and mobile applications using React, React Native, PHP, and WordPress.
- Gained foundational expertise in systems engineering, database management, and cross-functional product delivery.

## EDUCATION & CERTIFICATES

- **Bachelor of Technology (Information Technology) | 2015**
- **Employee of the Month Reward** – Metronomic Technology Solutions Pvt. Ltd.
- **Appreciation Certificate** – Successful Implementation & Delivery of 'Cross Pay' Mobile Application
